CHEVY VAN

CHEVY VAN—STANDARD MODEL

The standard model includes the following items as standard equipment

EXTERIOR

- **Bumpers:** Front and rear; painted white
- **Colors:** See Interior and Exterior Color Selection Chart
- **Doors:** RH and LH front side doors; RH sliding side load door; RH and LH rear load doors
- **Door Opening and Locking Methods:**
Front side doors: Outside pushbutton latch release in door handle with separate key lock; keyless outside locking
Sliding side load door: Turning outside handle counterclockwise releases both front and rear latches; to close door, reverse procedure; for opening and closing of door from inside, reverse outside procedure; door is locked from outside through a separate key lock
RH and LH rear doors: Pushbutton latch release in RH door handle opens door, and after opening RH door, LH door latch is released by lower inside lift handle; separate key lock cylinder in RH door
- **Glass:** Windshield; RH and LH front side door drop glass and pivoting ventpanes
- **Grille:** Painted; outer area white and inner area black with center-mounted Chevrolet emblem in bright trim and ochre paint fill. Headlamp bezels are painted white with black inner area
- **Horn:** Single, electric low-note
- **Hub Caps:** Painted white with black and ochre trim
- **Keys:** Two-key system, with separate keys for ignition switch and door locks
- **Lights:**
Backup lamps: Two rear (integral with taillamps)
Combination parking/direction/hazard: Two front
Combination tail/stop/direction/hazard: Two rear
Headlamps: Two; Power Beam
License plate lamp: Single rear
Side marker lamps and reflectors: Two front and two rear

- **Mirrors:** RH and LH chrome; fixed arm with adjustable 4 1/2" x 6" head
- **Nameplates:** Bright "Chevy Van/Series" plates on front fenders; bright "Chevrolet" plate on LH rear door
- **Tools:** Mechanical jack and wheel wrench
- **Undercoating:** On body rocker panels, step panels, wheel-houses
- **Wheels:** Painted white
- **Windshield Wipers and Washers:** Electric, 2-speed wipers with matte finish on exposed metal portions; coordinated washers

INTERIOR

- **Air Vents:** RH and LH; individually controlled
- **Armrest:** LH side door; padded
- **Ashtray:** In top of engine cover; with door
- **Coat Hook:** LH side
- **Colors:**
Painted areas: Same as exterior primary color choice
Interior trim: Coordinated with seat trim color choice
- **Door Locks:** Inside pushbutton lock/release (except rear doors)
- **Door Seals:** Latex foam rubber
- **Floor Covering:** Embossed black rubber mats, LH front floor area and wheelhouse
- **Headliner:** Parchment-colored perforated hardboard; driver area
- **Heater and Defogger:** Deluxe-air
- **Instruments:**
Gauges: Speedometer, odometer, and fuel
Switches: Main, for control of exterior lights, instrument lights, and dome lights; wiper-washer; headlamp beam (foot); ignition; direction signal (with lane change position); hazard warning; heater fan
Warning lights: Generator, oil pressure, engine temperature, brake, direction/hazard signal, and high beam
- **Instrument Cluster Bright Trim:** Outer edge of face plate and instrument bezels
- **Instrument Panel Control Knobs:** Soft black plastic (except heater and wiper-washer controls); white graphic identification
- **Insulation and Sound Deadening Material:** Dash (fire-wall), LH front floor panel, engine cover extension and between engine cover walls
- **Lights:** Instruments, front and rear dome with bright trim
- **Safety Step Pads:** Front and sliding side door step panels
- **Seat:** Front, bucket driver; all-vinyl trim; foam padded. See Interior and Exterior Color Selection chart for color availability
- **Seat Belt:** Pushbutton release, with outboard retractor
- **Spare Tire Carrier:** RH rear side
- **Steering Wheel:** Oval 17" x 17 1/2", black wheel with 2 spokes

- **Storage Box:** On front face of engine cover; without door
- **Sunshade:** LH padded, color keyed
- **Trim Panels:** Painted metal with decorative embossments; front side doors and sliding side door

CHEVY VAN

CUSTOM APPEARANCE EQUIPMENT OPTION—RPO Z61

(This option includes all exterior items listed for the standard model plus the following additions or substitutions)

EXTERIOR

- **Bright Appearance Items:**

- Chrome grille with black paint trim
- Headlamp bezels with silver paint trim
- Hub caps
- Lower body side and rear moldings with black paint trim
- Taillamp bezels

CUSTOM COMFORT AND CONVENIENCE EQUIPMENT OPTION—RPO Z62

(This option includes all interior items listed for the standard model plus the following additions or substitutions)

INTERIOR

- **Cigarette Lighter**
- **Horn:** Additional, electric high-note

BODY GLASS COMBINATIONS

**2-WINDOW RH BODY SIDE GLASS
(RPO A08)**

Two-window glass for RH side of vehicle only. Windows with fixed glass provided in RH rear-quarter panel and in sliding cargo door.

6-WINDOW BODY GLASS (RPO A07)

Full body glass consisting of six fixed-glass windows. Option is comprised of LH and RH rear-quarter window glass, LH front-quarter window glass, RH cargo door glass, and LH and RH rear cargo door glass. An inside rearview mirror is included.

See Options; Glass; for Swing-Out Rear Door Glass (RPO A18), Fixed Rear Door Glass (RPO A12), and Fixed Side Door Glass (RPO A13).

CHEVY VAN

BODY CONSTRUCTION FEATURES

The all-steel, Chevy Van and Sportvan bodies feature body-frame integral construction for outstanding structural rigidity and excellent durability. The basic bodies of either the nominal 15 foot (110" WB) or 17 foot (125" WB) models are comprised of an underbody structure, front end structure, left and right hand side panel structures, and a roof panel structure.

Longitudinal side rails, cross sills, and outriggers form the integral frame to which front and rear floor panels are welded, completing the underbody structure. Main structural members are of heavy-gauge steel. A step well is incorporated in the underbody in the area adjacent to the base side load door to provide convenient entry and exit.

The front end structure incorporates an engine compartment with outside opening hood panel which affords quick and easy access to 27 service points, such as the engine, radiator, battery, brake master cylinder and windshield washer reservoir. The radiator support upper tie bar and baffles are mechanically attached to facilitate engine removal. A plenum chamber with high-level air intake is utilized in the front end structure to assure a plentiful supply of dry, outside air for interior heating and ventilating as well as to add rigidity to the overall body structure. Air outlets to the interior are provided on the left hand and right hand sides by manually controlled doors.

Side panel structures are comprised basically of seamless, one-piece outer panels reinforced with vertical strainers and welded to roof rails at the top and to rocker panels at the bottom. Left hand side panel structures utilize three vertical strainers, with a fourth strainer added for 17-foot bodies. Right hand side panel structures, which are smaller because of the provision for the base side load door, are reinforced with one vertical strainer in 15-foot body applications and two strainers in 17-foot body applications. Two window openings are incorporated in the left hand side panel for all Sportvans, or for Chevy Vans with optional body glass; the right hand side panel for these models has one window. Provision is made at the rear of the left hand side panel for incorporation of a door to conceal the fuel tank filler.

Roof panels are of one-piece design and are embossed with six

longitudinal stiffening ribs. Four roof bows support the 15-foot body roof panel, while five roof bows are used for the 17-foot body.

Special attention is given to corrosion prevention during the construction and final finishing of the Chevy Van/Sportvan body. The following body design features occur during the construction of the body:

1. Use of galvanized steel for body components especially subject to corrosion.
2. Use of one-piece outer panels to minimize exterior joints where corrosion might collect.
3. Use of heavy-gauge steel for main underbody components.
4. Use of weld-through sealers in the assembly process to assure strong welds.

After body construction is completed, additional corrosion preventative steps are taken in the final finishing operation. The following occur:

1. The body and doors are thoroughly cleaned by processing them through a 7-stage zinc phosphate washer.
2. Next, the body and doors are primed by the Elpo electro-coating process which is the deposition of an electrically charged colloidal paint using an electric current. Electro-coating assures uniform application of primer even on surfaces normally inaccessible. In the process, the body and doors are submerged in an emulsion of water and paint; the emulsion is then negatively charged, causing the paint to adhere to the metal. Paint film thickness is accurately controlled by the amount of voltage.
3. Sealers are then applied to all critical interior-exterior joints.
4. Undercoating is sprayed on the undersurfaces of the wheelhousings, front door step panels and body rocker panels.
5. Finally, the body and doors are painted with enamel.

CHEVY VAN

CHEVY VAN SEATING AND LOADSPACE

Seating arrangement for standard and optional seat.

STANDARD

OPTIONAL

*110" WB MODELS

INSTRUMENTS

The standard instrument cluster has a black crackle finish faceplate with bright trim on the perimeter and around the three instrument openings. Housed in the left hand opening is the speedometer, odometer, and high beam indicator light. The central opening contains a decorative plate on which is centered the brake system warning indicator light; below this opening are the left and right hand turn signal lights. The fuel gauge plus generator, temperature, and oil pressure warning lights are housed in the right-hand opening. An "Unleaded Fuel Only" notation is carried on the faces of the fuel gauge for models under 6001 lbs. GVW. A

similar instrument cluster with voltmeter, oil pressure gauge, and temperature gauge is available as RPO Z53. To the left of the instrument cluster are the windshield washer-wiper controls, main light switch and provision for the left-hand air conditioning outlet. To the right are heater controls (or optional heater-front air conditioning controls), provision for the optional rear air conditioning control, and provision for the optional cigar lighter. On any model with optional air conditioning, simulated wood-grain trim replaces the black crackle finish of the faceplate, and the bright trim is omitted from around the three instrument openings.

CHEVY VAN

INTERIOR AND EXTERIOR COLOR CHART

Please Note: Exterior and interior combinations shown in charts below are those recommended by Chevrolet; however, any exterior color combination may be ordered with any available interior color if the particular combination is desired by a customer.

SOLID AND TWO-TONE* EXTERIOR COLOR COMBINATIONS

The application of paint for solid and two-tone exterior color combinations is shown below.

SOLID PAINT—ZY1

SOLID COLOR

Solid color paint (ZY1) is standard on all models. All painted areas of the body are the same color.

SPECIAL TWO-TONE—ZY3

Primary Body Color

Secondary Body Color

SPECIAL TWO-TONE

Special two-tone (ZY3) paint colors consist of a primary paint color applied to the areas above the upper styling crease line and below the lower styling crease line. The secondary color is applied to the area between these styling crease lines. The choice of secondary colors is limited to those listed for each primary color in the color chart.

DELUXE TWO-TONE PAINT—ZY4

Primary Body Color

Secondary Body Color

DELUXE TWO-TONE

Deluxe two-tone (ZY4) paint colors consist of a primary paint color applied to the areas above the belt line and also to the areas between the upper and lower styling crease lines. The secondary color is applied to the areas between the belt line and the upper styling crease line and also to the area below the lower styling crease line. The choice of secondary colors is limited to those listed for each primary color in the color chart.
